FUTURE_DS_01_Business_Sales_Performance_Dashboard

Business Insights

1. West Region Generated the Highest Sales

The **West** region recorded the highest total sales among all regions.

This indicates strong customer demand and market performance in the West.

The company should continue investing in marketing and inventory for this region.

2. South Region Recorded the Lowest Sales

The **South** region has the lowest sales compared to the other regions.

This may indicate lower customer demand or fewer business opportunities.

Targeted promotional campaigns and regional marketing could help improve sales.

3. Technology Category is the Best Performer

The **Technology** category contributes the largest share of total sales.

It is one of the company's strongest product categories.

Maintaining sufficient stock and introducing new technology products can help sustain growth.

4. Furniture Category Generates Lower Profit

Although Furniture contributes a good portion of sales, its profit is lower than Technology.

This suggests higher costs or lower profit margins.

Reviewing pricing strategies and supplier costs could improve profitability.

5. Monthly Sales Show an Upward Trend

Monthly sales generally increase over the four-year period.

Sales peak during certain months, indicating seasonal demand.

Planning promotions and inventory around these peak periods can maximize revenue.

6. A Few Customers Contribute Significant Revenue

The **Top 10 Customers** generate a substantial share of total sales.

These customers are valuable to the business.

Loyalty programs, personalized offers, and excellent customer service can help retain them.

7. Strong Overall Business Performance

The dashboard shows:

Total Sales: ₹22,97,200.86

Total Profit: ₹2,86,397.02

Total Orders: 9,994

Total Quantity Sold: 37,873

Average Sales per Order: ₹229.86

These metrics indicate healthy sales activity and a solid customer base.

8. Interactive Filters Enable Better Decision-Making

The dashboard includes slicers for **Region**, **Category**, **Segment**, and **Ship Mode**, along with an **Order Date Timeline**.

Users can quickly analyze performance for different business segments, making the dashboard useful for managers and decision-makers.

Conclusion

The dashboard indicates that the business is performing well, with **Technology products** and the **West region** driving sales growth. While overall sales and profit are strong, there is an opportunity to improve performance in the **South region** and increase profitability in the **Furniture** category. The interactive dashboard enables fast, data-driven decision-making by allowing users to filter results by region, category, customer segment, shipping mode, and time period.

These insights are suitable for including in your **Insights** worksheet and explaining during your internship presentation.
